**Chocolate** is a typically sweet, usually brown food preparation of Theobroma cacao seeds, roasted and ground. It is made in the form of a liquid paste, or in a block, or used as a flavouring ingredient in other foods.

Chocolate has become one of the most popular food types and flavours in the world, and a vast number of foodstuffs involving chocolates have been created, particularly desserts including cakes, pudding, mousse, chocolate brownies, and chocolate chip cookies. Many candies are filled with or coated with sweetened chocolate, and bars of solid chocolate and candy bars coated in chocolate are eaten as snacks.

Chocolate is wildly popular for individual consumption, as gifts and for the purposes of baking and cooking. Due to the dominance of large-scale production dynasties, franchises and small businesses tend to focus on unique or specialty items and services. The demand for cocoa is predicted to rise by 30% by 2020, the industry is all set to ignite for a country like India. The chocolate industry offers a wide variety of opportunities for the small business owners too. The industry growth will be driven by population growth as well as expansion into new markets, product innovation and rising disposable income levels leading to a greater purchasing of premium offerings.
