

Export-Import Procedure, Documentation & International Entrepreneurship

The growing complexities of international trade, globalization of the markets, internet and stiff competition require every entrepreneur to have a thorough knowledge of the theory and practice of international trade. Keeping in view the major problems one faces either as a beginner or as a trainer with respect to locating foreign market, product sourcing ,pricing, payment , financing procedures and documentation, buyer search , export promotion etc. The programme explains all that you wanted to know about exports. In short, the course not only helps the beginner to enter into exports, but also impart in depth knowledge to the trainer for handling various aspect of export-import trade.

The six days programme combines theory with practice in a simple way making the overall subject easy to understand. The course is specially designed for students, working executives, entrepreneurs and trainers.

Export trade though not difficult, but it is complex. Chapter wise study not only minimizes the complex nature of this trade but also boosts your confidence to enter in this trade.
